August 14, 2013
Shrewsbury Public Schools
Invoice 2
PO# 150441

Description of Services:

A sponsored student is any student using myHomework that has been affiliated with Sherwood or Oak Middle school.

For all sponsored students:
1. Advertising shall be removed from the entirety of the myHomework apps and website.
2. A 640px x 180px image will be displayed on the home page across the myHomework apps and website. A primary and secondary hex color may also be provided to further customize the appearance of myHomework.
3. A list of files and links may be provided that will be easy for all students to access on the school's page.
4. Schoolwide announcements may be received by all sponsored students.

For all sponsored teachers:
1. Advertising shall be removed

For the 2014-2015 school year, approximately 2000 students are expected to fall into the sponsored population.

Service will be enabled by August 17th, 2014.

Total Due: $4,000.00

Learning Management System

ENTERPRISE EDITION

Sales Order for:

Shrewsbury Public Schools

Shrewsbury School District - 4-12 (18 month) Enterprise Implementation

100 Maple Ave

Shrewsbury, MA 01545-5398

Dan Gottlieb

Regional Sales Director

dgottlieb@schoology.com

(800) 393-7550 x46

Schoology, Inc.

115 W. 30th St., 10th Floor

New York, NY 10001

www.schoology.com

Introduction

Schoology proposes to work closely with Shrewsbury Public Schools to implement a digital learning environment that promotes learning, communication, and collaboration inside and outside of the classroom.

Schoology is a dynamic, user-centric learning management solution that adjusts to any educational environment. Schoology's versatility derives from three key components: learning management, enhanced communication, and third-party integration. Using Schoology's engaging tools, educators can create custom courses, pace students individually, and differentiate instruction. Schoology also facilitates improvement by providing educators access to globally shared resources. Finally, Schoology seamlessly integrates third-party software via its advanced API. This award-winning, comprehensive approach ensures engagement and magnifies achievement worldwide.

After launching in 2009, Schoology is now in more than 50,000 schools and organizations across more than 132 countries worldwide. Schoology is transforming learning by making academic improvement more accessible. Thousands of schools around the world are working together to engage students more effectively, and this is just the beginning.

Enterprise Subscription

Schoology offers a complete cloud-based solution. All hardware, database, and maintenance costs are included in the pricing. Shrewsbury Public Schools will **not** incur costs associated with system upgrades or releases that improve the current features.

1. **LDAP/Single Sign-On (SSO) Integration**

    Schoology will make available a SSO script that can be used to establish SSO with third party applications and directories. This will mean that all users will be able to use their school assigned username and password to access the Schoology environment. Shrewsbury Public Schools will still maintain all usernames, passwords, user groups, roles, and account names locally.

2. **Advanced User Management**

    Shrewsbury Public Schools will have access to Schoology's Advanced User Management Interface which allows administrators to manage user roles, permissions, privacy, and overall system settings. This also affords administrators the ability to bulk-add users either using import files or, for more advanced users, programmatically via our REST API.

3. **Enterprise Management Interface**

    Shrewsbury Public Schools will be able to create multiple buildings using the Enterprise Management Interface. Administrators can organize users into individual buildings, and they can designate different users as administrators. The system administrator is able to then manage all users and schools from the main parent account while certain administrators will be responsible for a particular group of users across different buildings.

4. School Site Branding

Schoology will provide custom branding services to the Schoology interface for Shrewsbury Public Schools. Schoology will brand the top banner and links with Shrewsbury Public Schools's desired color scheme, and Schoology will also replace the Schoology logo with Shrewsbury Public Schools's organization logo. In addition, Shrewsbury Public Schools will receive domain customization (e.g. lms.schoolname.org) or subdomain customization (e.g. schoolname.schoology.com).

5. Support Services

Schoology offers two levels of support:

a. The first level is community-based support that is available to all administrators and instructors via a "Feedback/Support" button located in the dropdown menu in the upper right corner of Schoology. Community support is helpful for finding frequently asked questions and for posting new ideas. As part of your support management practices, you may choose to recommend this level of support for teachers and other staff or faculty at your school.

b. The second level is dedicated support. As an enterprise client you have access to our dedicated support. You may choose up to three (3) dedicated support contacts from your school/district, whose role is to relay any questions, concerns or ideas to the Schoology team. These three (3) main support contacts can contact Schoology by:

1. Phone: Support contacts may contact a Schoology representative by using a support code listed in the "Feedback/Support" button (only visible to support contacts).

2. Email: Support contacts may email a Schoology representative by emailing **help@schoology.com**.

3. Ticketing System: Support contacts may create their own support tickets by going directly to support.schoology.com.

Services

After we have received Shrewsbury Public Schools's signed Sales Order, Shrewsbury Public Schools's a dedicated Client Success Specialist will send an Implementation Verification Document to verify information and gather some additional account information. Upon receiving the verification document, the Client Success Specialist will schedule a kickoff call to begin the implementation process. During the kickoff call, the Client Success Specialist will review all of the initial setup steps that Shrewsbury Public Schools will need to get started, as well as address any potential questions or needs that Shrewsbury Public Schools might require.

After the kickoff call, Shrewsbury Public Schools will have access to Schoology's consulting services, which includes check-in calls and support during implementation. During this process, we establish milestones for your Enterprise Subscription system configuration, and product training. Schoology will provide continual support throughout the implementation process through our dedicated Client Success Specialists and tiered support system.

6. Implementation

After the kickoff call, the Success Specialist will provide a launch pack that serves as a resource guide for setting up the Schoology system. Shrewsbury Public Schools's Client Success Specialist will assist you in the configuration of your system. Items included in your implementation are basic account creation/management, system settings, branding and consulting around the overall implementation strategy.

In addition to the base implementation you also have the following options available:

- Data Population using SFTP or one of our existing SIS Integrations
- User logins using LDAP, Google SSO or Remote Authentication

7. Train-the-Trainer Web Delivered

Schoology offers web delivered product training to Shrewsbury Public Schools's support staff via a train-the-trainer approach. Our web training is setup for a maximum of 15 attendees and we recommend holding them in a computer lab with a projector and speaker phone. Most sessions are one to two hours in length and it helps to have a moderator present for questions. This type of training is often utilized mid-year to provide additional support on intermediate and/or advanced features. The Schoology Professional Development team will work with project leaders in advance to determine the most effective outline for the web training and will work towards catering to specific client requests.

8. Train-the-Trainer Onsite

Schoology offers onsite product training for teachers and administrators via a train-the-trainer approach. Commonly the "Schoology for Master Instructors" course can be delivered using an onsite approach. Our onsite training is for a maximum of 15 attendees and should be held in a computer lab with a projector or in a room with sufficient wireless if the attendees are bringing their own laptops. Onsite trainings average of six hours of instruction.

The Schoology Professional Development team will work with project leaders in advance to determine the most effective outline for the onsite training and will work towards catering to specific client requests. Travel and Expenses are included in the purchase of an onsite training day.

(**Note**: The onsite training days require at least 14 days of lead time to accommodate for travel arrangements.)

After the kickoff call, Shrewsbury Public Schools will have access to Schoology's consulting services, which includes check-in calls and support during implementation. During this process, we establish milestones for your Enterprise Subscription system configuration, and product training. Schoology will provide continual support throughout the implementation process through our dedicated Client Success Specialists and tiered support system.

6. **Implementation**

    After the kickoff call, the Success Specialist will provide a launch pack that serves as a resource guide for setting up the Schoology system. Shrewsbury Public Schools's Client Success Specialist will assist you in the configuration of your system. Items included in your implementation are basic account creation/management, system settings, branding and consulting around the overall implementation strategy.

In addition to the base implementation you also have the following options available:

- Data Population using SFTP or one of our existing SIS Integrations
- User logins using LDAP, Google SSO or Remote Authentication

7. Train-the-Trainer Web Delivered

Schoology offers web delivered product training to Shrewsbury Public Schools's support staff via a train-the-trainer approach. Our web training is setup for a maximum of 15 attendees and we recommend holding them in a computer lab with a projector and speaker phone. Most sessions are one to two hours in length and it helps to have a moderator present for questions. This type of training is often utilized mid-year to provide additional support on intermediate and/or advanced features. The Schoology Professional Development team will work with project leaders in advance to determine the most effective outline for the web training and will work towards catering to specific client requests.

8. Train-the-Trainer Onsite

Schoology offers onsite product training for teachers and administrators via a train-the-trainer approach. Commonly the "Schoology for Master Instructors" course can be delivered using an onsite approach. Our onsite training is for a maximum of 15 attendees and should be held in a computer lab with a projector or in a room with sufficient wireless if the attendees are bringing their own laptops. Onsite trainings average of six hours of instruction.

The Schoology Professional Development team will work with project leaders in advance to determine the most effective outline for the onsite training and will work towards catering to specific client requests. Travel and Expenses are included in the purchase of an onsite training day.

(**Note**: The onsite training days require at least 14 days of lead time to accommodate for travel arrangements.)

Master Services Agreement

By accepting this Sales Order, you are agreeing to the terms of the Schoology Master Subscription Agreement, which is located here:
